OUTDOOR LIGHTING

in-lite[®]

MORE THAN A BRAND

in-lite is more than just an outdoor lighting brand. We're a company with a mission. We do this by developing beautiful outdoor lighting fixtures but above all by inspiring as many people as possible and showing that lighting belongs in every outdoor space. And we don't do this alone. An extensive network of partners and outdoor professionals have the exact same mission. We train these professionals and inspire them with unique ways to use lighting. Together we make every outdoor space a unique place you can fully enjoy in the evenings.

ACE CONCEPT

ACE is one of the most complete concepts in our product range. It offers bollards and wall lights in five different colors. This modern and simplistic concept is perfect for any outdoor space. It has a minimalistic design and a unique sleek lighting effect.

Customize the fixtures in the ACE concept with in-lite accessories that are specially designed to play with light.

SWAY TABLE

Wireless and chargeable table light: SWAY TABLE. In the distinctive style of the SWAY concept. An attractive, handy table light for indoor and outdoor use.

SWAY CONCEPT

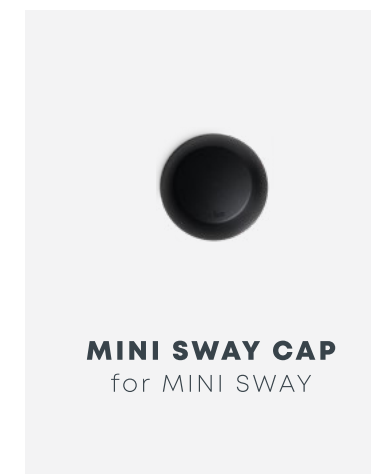

The SWAY concept offers path lights, wall lights, pendant lights in two different colors and a table light. It is designed from the idea that a fixture can be one with nature, so it does not always have to stand out. The minimalist design results in an elegant, friendly look that is very contemporary.

The SWAY lighthouse is available in two different sizes and colors. This makes them perfect for combining in creative ways. The pendant light is also available in 100-230V fixtures.

RECESSED LIGHTS

At in-lite you can choose from many different ground spots and you can use them roughly everywhere in your outdoor space. Such as your driveway, facade, trees, canopy, fence and to light up your path.

NERO

NERO produces a light distribution of at least 8 meters with a wide light angle. Its attractive design with a flat ring makes it perfect for illuminating trees from gravel and grass.

Scan the QR-code to explore all the recessed lights

FUSION

FUSION is the softest light from in-lite. Want something truly unique? Combine the various sizes to create your own "starry night" effect. FUSION is fitted with the diffuse lens to ensure that the light does not glare. Available in: 60 mm and 22 mm

BIG FLUX

Recessed light BIG FLUX is ideally suited for illuminating tall elements in the garden. The light range is between 6 meters and 11 meters high. Choose from different ring colors Pearl Grey, Black and Stainless Steel.

LUNA

LUNA (Light Under 'N Angle) is ideal for illuminating elements like walls, bushes, facades, fences and more. Its recessed profile is safe to walk, drive, and use a lawn mower over, making it a perfect option for illuminating objects from the ground up in a practical and beautiful way.

EVO FLOOD

EVO FLOOD is a sleek, wide outdoor spotlight made of anodized aluminum. This ground spotlight - with a beam of 10 meters wide - is the fixture from in-lite that provides the most expansive light. The wide beam makes EVO FLOOD perfect for illuminating a facade.

UNDERCAP LIGHTING

EVO HYDE 180

EVO HYDE 550

EVO HYDE available in:
180 mm (7") and 550 mm (22")
For mounting use accessory FIX

EVO

Take your landscape lighting to the next level with EVO concept. Use our popular EVO HYDE undercap lights or the EVO FLEX, a modern and continuous high-quality LED strip light that can be cut in the right size.

SCOPE & MICRO SCOPE

The focused light from the SCOPE series outdoor spotlight highlights special places in the yard such as trees, shrubs, statues and facades up to 8 meters high.

AIM

With AIM, the latest series of designer spotlights, we go one step further. We have developed a patent-pending method by which light sources can literally be stacked. This allows you to decide whether to use AIM with one, two or three light sources. It offers the user maximum flexibility and expandability.

Various fixtures and concepts in the in-lite range are modular. This way of thinking ensures that you have maximum freedom and can put together your own end product. Combinations can be made in product colour and fixture heights.

SMART TONE

Smart Tone products are easy to install and adjust in the in-lite app. It can emit both the familiar warm white and coloured light. Apart from choosing different colours, the light intensity can also be adjusted. We have a variety of Smart lighting. A SMART HUB is required for this fixture.

SMART SCOPE TONE

SMART SCOPE TONE is easy to set using the in-lite app. Excellent light quality and a reach of up to 4 metres makes this fixture suitable to light up different elements in your yard!

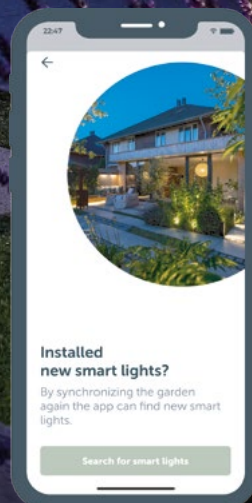

SMART EVO FLEX TONE

SMART EVO FLEX TONE offers a perfectly even LED strip with no visible light points. Equipped with dimmable colours. But of course it is possible to easily switch back to in-lite's well-known warm white.

Straight or rather organic shapes? Anything is possible thanks to the flexible shape of SMART EVO FLEX TONE.

SMART FLUX TONE

SMART FLUX TONE is the first ground spotlight in the SMART line, making it a welcome addition to the SMART collection. The ground spot also features KILLFLASH technology, making the light subtle and less blinding. Available in Black, Stainless Steel and Pearl Grey.

CHOOSE YOUR TRANSFORMER

Choosing the right transformer is critical. Most importantly, you need to have enough capacity on your system to hold all your fixtures. But you also want to be able to choose your personal preferences, like the operation. The differences are shown in the diagram here.

	HUB-100	SMART HUB-150	SMART HUB-300
Maximum connection value	100VA	150VA	300VA
Control	Touch screen	in-lite app	in-lite app

Maximum cable length of 10/2	80M	80M	160M
Plug & Play	✓	✓	✓

IN-LITE SMART

Since the introduction of the SMART HUB and in-lite app marks the dawning of a new era in which outdoor lighting plays an even greater role in our daily lives. The app for the SMART HUB was developed for iOS and Android phones. All smart products can easily be used in combination with a SMART HUB. With in-lite Smart, you are prepared for the future.

HUB-100

SMART HUB-150

SMART HUB-300

HUB-100

Transformer suitable for 100 VA installation value. The HUB-100 is operated with a touch screen and comes with a light sensor. MOVE (wired motion detector) sold separately.

SMART HUB-150

SMART HUB-150 has an installation value of 150 VA and comes with three lines that can be controlled individually using the in-lite app. Wireless motion detector (SMART MOVE) sold separately.

SMART HUB-300

SMART HUB-300 has an installation value of 300 VA and comes with three lines that can be controlled individually using the in-lite app. Wireless motion detector (SMART MOVE) sold separately.

THE IN-LITE SYSTEM

HUBS ¹

HUB is a transformer that controls the garden lighting. A choice of four different hubs is available: HUB-50, HUB-100 and SMART HUB-150 and SMART HUB-300. Add up the VA value of your lighting to find out which transformer will suit your garden.

CABLES ²

The cable can be rolled out from the transformer and guided along the fixtures. There are three types of cables available: 14/2, 12/2 and 10/2.

CABLE SPLITTING ³

Want to split or branch a cable? Use a cable connector (CC-2) to split the cable plan in no time.

EASY LOCK ⁴

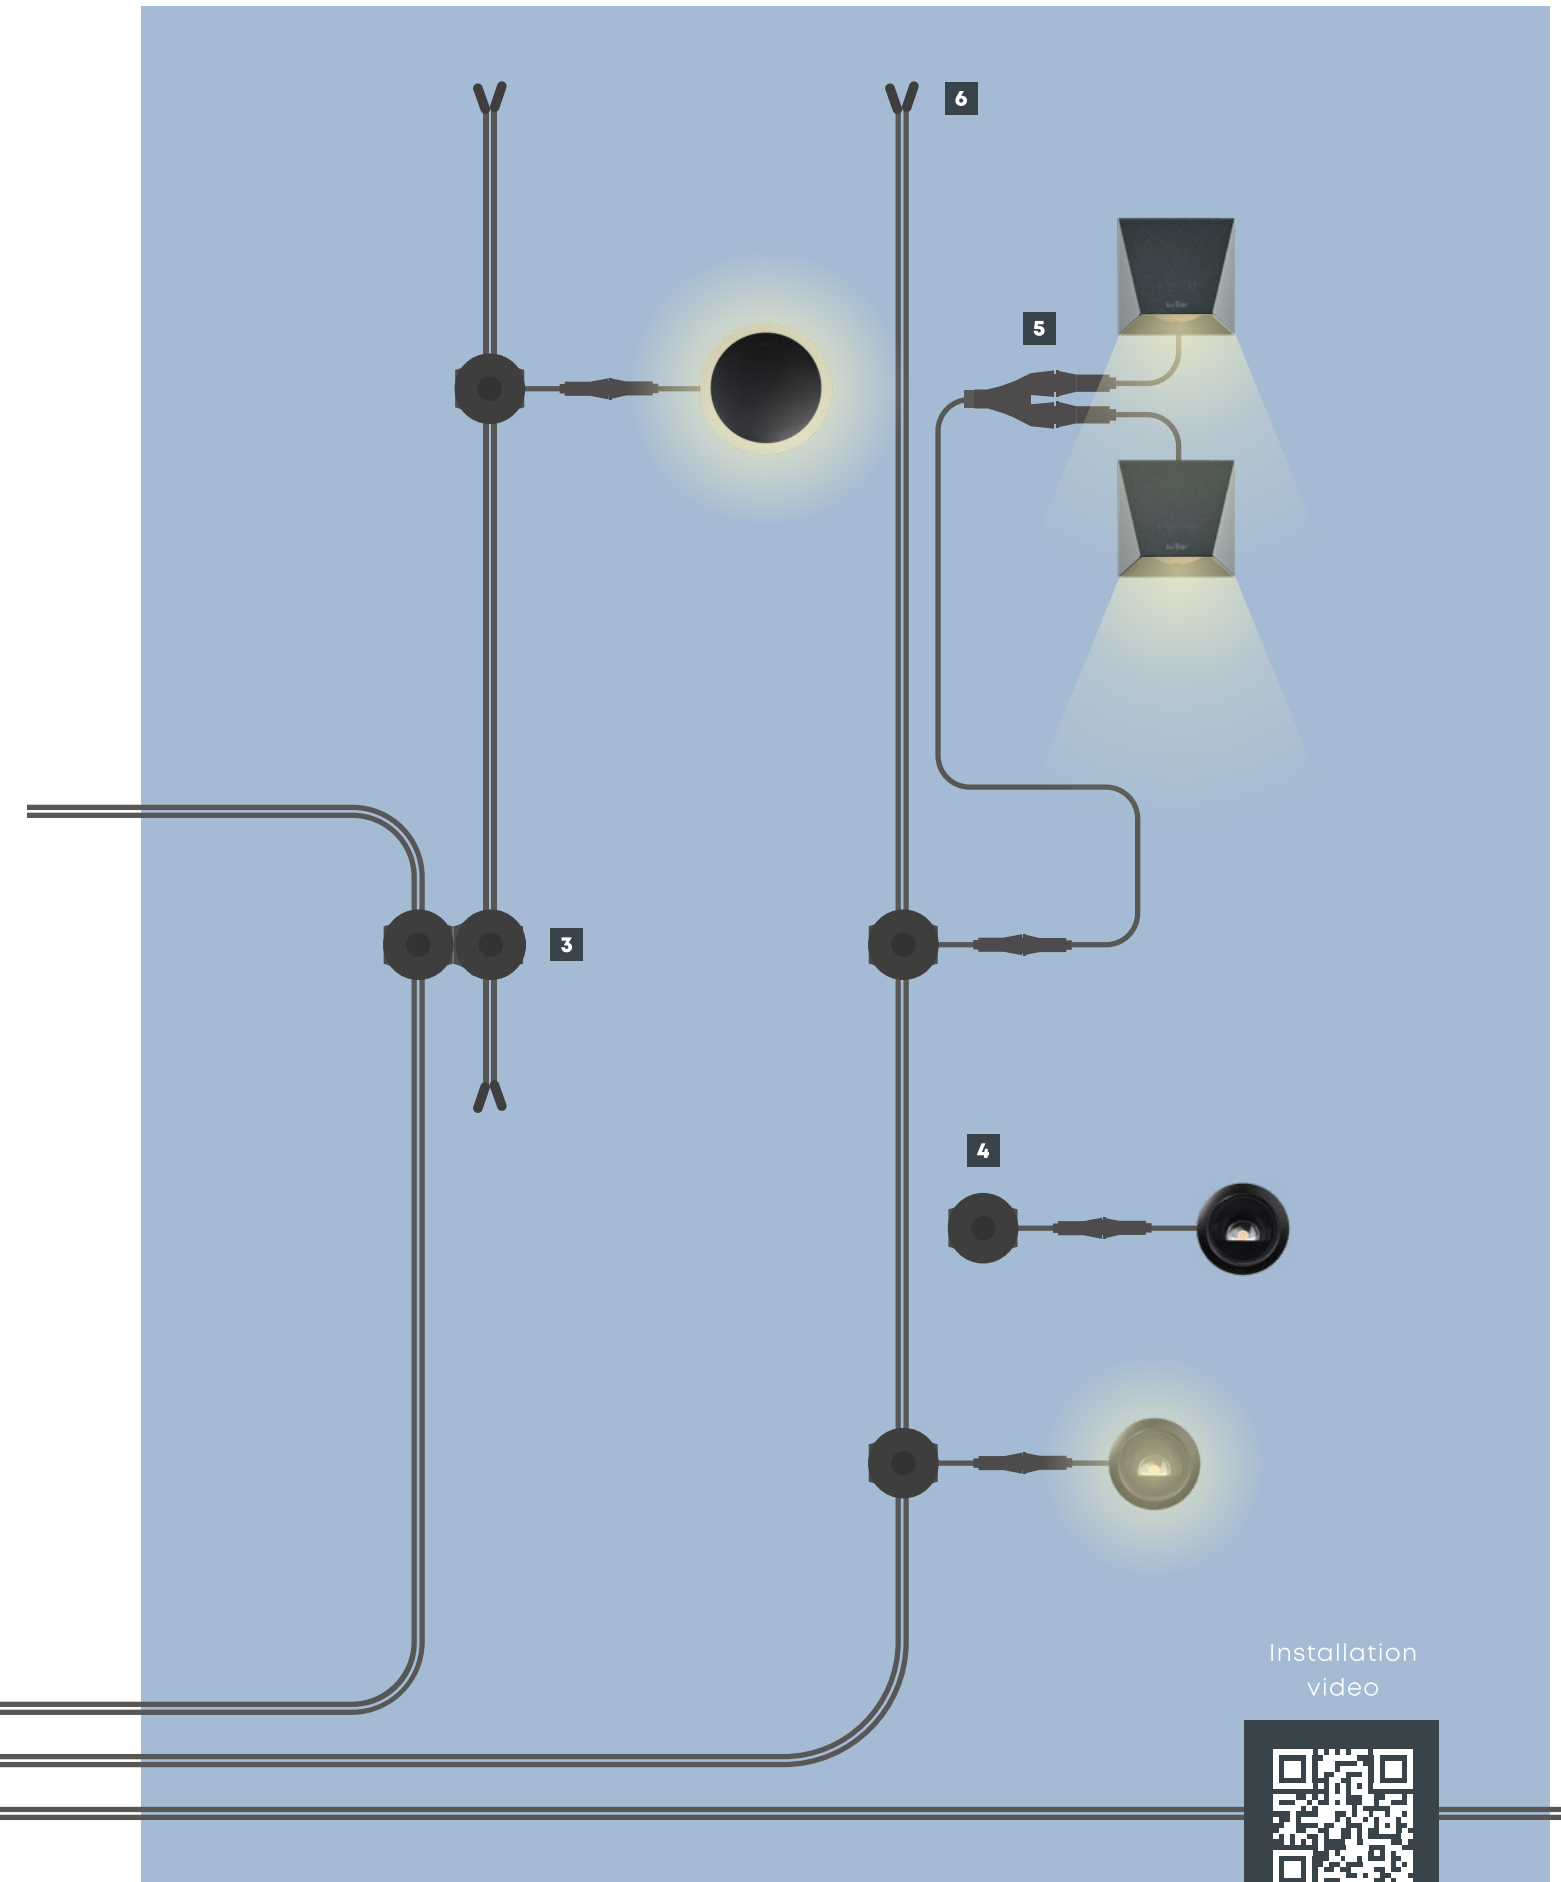

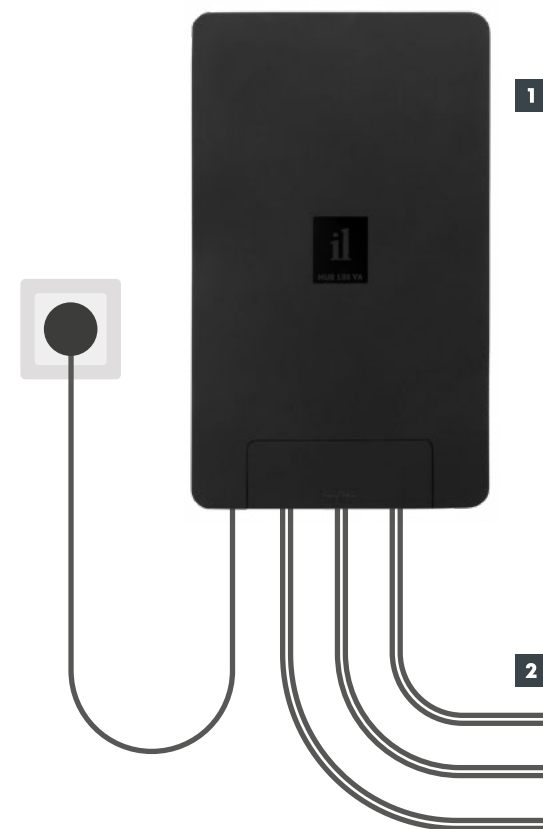

The in-lite EASY-LOCK connector allows you to connect an in-lite fixture to the main cable at any location.

ACCESSORIES ⁵

Is an in-lite fixture's cable too short? Simply use the extension cords. Another useful accessory is the splitter, which lets you connect two fixtures to one extension cord.

CABLE ENDS ⁶

The cable can end anywhere in the garden and does not need to form a closed system. Seal off the end of the cable with the cover caps provided to ensure that no moisture can get in and that the cable ends do not come into contact with one another. Thus preventing short-circuiting.

Installation video

EASY- LOCK CONNECTOR

The EASY-LOCK connector is in-lite's patented connection system. The connector punctures the low-voltage cable and releases a dielectric grease to create an air-tight seal by simply twisting the cap onto the body of the connector.

WHY IN-LITE?

in-lite is the fastest growing outdoor lighting manufacturer in the industry for a reason. Our high-quality products, patented connection system, and innovative technology, are built with the professional in mind. We are committed to helping professionals grow their business through lighting by providing unbeatable customer service, extensive training and education, and the best lights on the market.

CRI (COLOR RENDERING INDEX)

So, what is CRI? CRI evaluates the color rendition and accuracy of objects under manufactured light compared to how those objects would look under natural light (100 CRI). The higher the numerical value of CRI, the better the light will reproduce those vibrant, beautiful colors. The quality of in-lite products is unmatched. We use only the highest quality LEDs in our fixtures to ensure the best quality light possible. With light output as high as CRI 98, we promise our lights will make your projects stand out and highlight key elements in the way they deserve.

SMART HUB PROTECTOR

The SMART HUB PROTECTOR has been introduced to further protect the in- lite SMART HUB transformer. This accessory extends the life of the product in harsh weather conditions. When the transformer hangs outside without PROTECTOR, the warranty will be void.

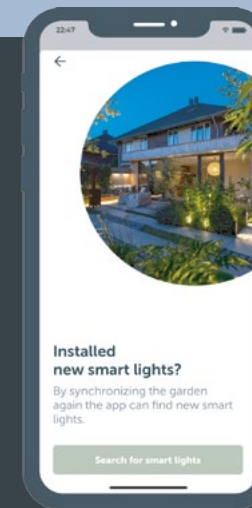

SMART MOVE

SMART MOVE is a wireless motion sensor that's connected to the in-lite SMART HUB. Just like the SMART HUB, the wireless SMART MOVE can be controlled using the in-lite app through a Bluetooth connection. Once movement is detected, the light can be set variably to stay on from 1 to 60 minutes.

SMART BRIDGE

The SMART BRIDGE is an system accessory that creates a bridge to the internet in order to integrate with 'smart home' systems like Google Home, Apple Homekit and Amazon Alexa. Lighting can also be activated with voice commands. Easy to connect to your Smart Home system.

IN-LITE APP

The introduction of the SMART HUB to the in-lite product portfolio means the beginning of a new era in which outdoor lighting is fully integrated into our lives. The app for the SMART HUB has been developed for iOS and Android smartphones and allows you to set up and save all features of the SMART HUB, and to share them with other users of the in-lite app. Download the app and discover the world of SMART.

CREATING GARDENS

IN PHASES

The unique in-lite system makes it possible to expand your lighting step by step. You start by installing a sufficient number of cables in the garden and over time, you simply add new fixtures as desired. Your dream garden will be a reality in no time!
